UNIVERSITY

STATISTICS CONSULTANCY PLATFORM

latrobe.edu.au/statistics

The **La Trobe University Statistics Consultancy Platform** provides statistical advice about research methods, experimental design and data analysis in order to improve the quality and impact of research outcomes.

CAPABILITIES

The consultancy offers a range of services which include:

- statistical analysis of data
- statistical support for grant and ethics applications
- advice on data collection methods
- guidance on study, survey and questionnaire design
- advice on statistical modelling
- access to specialist statistical software
- help in communicating statistical findings

EXPERTISE

Our team of statisticians is experienced in a broad range of statistical methodologies and can offer support across all disciplines of research.

TRAINING

Our team offer training opportunities in statistical methods, study design and in the use of tools and software.

COLLABORATION

We also support an interactive forum to encourage collaboration and sharing of ideas among researchers.

Access

Services are available to La Trobe staff and students as well as external organisations and industry.
